

VIDEOS AVAILABLE FROM THE
STATE OF WASHINGTON
DEPARTMENT OF HEALTH

All videos are available to any licensed health care facility or transient accommodation free of charge (except return postage). Please call Mike Paddock at (360) 705-6784 or e-mail: mzp0303@doh.wa.gov.

1. Hotel Fire Alert: Employee Procedures

This video demonstrates the actions to take in a hotel fire and encourages employees to make safety checks part of their daily routines. (22 minutes)

2. Fire Power

This video is a vivid account of fire - from ignition to full fire involvement. Your audience will see the patterns of smoke and flames as they spread. They'll see what a big difference automatic sprinklers can make. You'll see how quickly a fire spreads and how thick smoke and intense heat move faster than the flames themselves. (17 minutes)

3. Firesafety in Health Care Facilities

This acclaimed training video examines the major causes of health care facility fires, ways to prevent them, and how to respond effectively in a fire emergency. Subjects include: how to spot and eliminate fire hazards; why fire protection systems must always be in working order; why it is essential that employees know the location of fire alarms in their work areas; why emergency response drills are the best preparation for a real fire; how to implement R.A.C.E. in a fire emergency; and why smoke inhalation causes more injuries than fire itself.

4. Evacuation of Medical Facilities

This video covers the basics of fire evacuation in health care facilities. Teaches staff how to respond effectively, so they'll be ready if a crisis occurs. (17 minutes)

5. Washington's Disasters: Are You Ready?

Are Washington state citizens and businesses prepared for a natural disaster? (80 minutes)

6. Smoke Guard

Smoke Guard units are used with fire-resistive elevator doors to satisfy the requirements of the Uniform Building Code, thereby allowing the elevator door to open directly into a fire-resistive corridor.

7. Is It Worth The Risk?

An AHA video about infection control, hand washing, and universal precautions.

8. Urinary Incontinence (2 copies)

Health Standards & Quality Bureau copy of the satellite broadcast of January 27, 1997. (1 hour 51 minutes)

9. Hemodialysis (2 copies)

Core curriculum for the dialysis technician. A video review of Hemodialysis. 48 minutes)

10. A dose of Reality, Physician Earthquake Preparedness

Physicians discuss the need to be prepared from first hand experience. (16 minutes)

11. What Happened to Harry?

An overview of potential cross connections in a mock healthcare setting. (12 minutes)

12. Field Testing Backflow Preventers

A University of Southern California production on how to test RPBA, DCVA, and PVBA assemblies. (75 minutes)

13. Working Together for Safe Water

A University of Southern California production to introduce the basic concepts of backflow and cross-connection control. (15 minutes)

14. Tuberculosis Protection for Healthcare Workers

The Association for Practitioners in Infection Control (APIC) has released an updated educational video on TB for healthcare workers. This 18 minute video was designed by a team of experts under the direction of APIC.

15. Eight Strategies to Prevent the Spread of Infection

This unique and entertaining video introduces eight powerful strategies that you can use to protect yourself, your family, and your community from disease-causing germs that increasingly affect our personal and public lives. An APIC approved 28 minute video.
